

INFORMS YOU

Date 07/02/07

n° 07 001

that we have carried out the following technical modifications:

NEW DIGITAL CONTROL BOX RMG/M ON RS/M BLUE BURNERS:

We inform you that:

STARTING FROM FEBRUARY 2007

The new RMG/M control box will be introduced on RS/M BLU burners, replacing the previous LMG22.

The LMG22 and RMG/M control boxes are not interchangeable.

The reason for this modification is the deletion from production from the Siemens supplier, but will guarantee however the supply of spare parts in the future.

The new control box RMG/M guarantees the same functionality of the previous LMG22 and therefore the diagnostic and the remote release functions.

The new burner models with RMG/M will have new codes that will replace the previous ones.

For the old burner codes it is possible to order the LMG22 spare parts as usual without any variation of the code.

The following summary table shows the relation between the old and new burner codes and the correspondent spare parts codes:

Burner Description	Old Burner Codes (with LMG22)	LMG spare part code	New Burner Codes (with RMG)	RMG spare part code
RS 160/M BLU	3788002	3002478	3788006	3013362
RS 160/M BLU	3788003	3002478	3788007	3013362
RS 160/M BLU	3788004	3002478	3788008	3013362
RS 160/M BLU	3788005	3002478	3788009	3013362
