

RS 25÷200/E-EV BLU SERIES

The RS/E BLU and RS/EV BLU burners series covers a firing range from 44 to 2400 kW, and it is based on a new Digital Burner Management System, Riello REC27-37, which is able to manage the air-fuel ratio by independent servomotors in order to obtain a perfect output control and to assure a correct combustion and safe operation on all modulation range. Operation can be "two stage progressive" or, alternatively, "modulating" with the installation of a PID logic regulator and respective probes.

RS/E BLU burners series guarantees high efficiency levels in all the various applications, thus reducing fuel consumption and running costs; specific versions are available to operate with Variable Speed Drive technology base on the control of a Frequency Inverter that modifies the air flow through the motor speed variation. Optimisation of sound emissions is guaranteed by the special design of the air suction circuit and by incorporated sound proofing material.

Please see designation of Gas Train Series in the page before the Catalogue index.

* 230V/50Hz -220V/60Hz electrical supply.

The valves seal control device is compulsory (conforming to EN 676) on gas trains to burners with a maximum output over 1200 kW.

The seal control function is managed by REC control box, by installation on gas train of a pressure switch (please see Gas train accessories paragraph); it is included as standard equipment on RS 120/E-EV-160/E-EV-200/E-EV BLU models.

To select the gas train please refer to the technical data leaflet and/or instruction manual.

RS 25÷200/E-EV BLU SERIES**Burner accessories****Accessories for modulating operation**

To obtain modulating operation, the RS/E BLU series of burners requires a regulator with three point outlet controls. On RS 25/E – 35/E BLU the regulator is connected to the burner electrical wiring by plug-in system in order to make the connection easier and faster.

The following table lists the accessories for modulating operation with their application range.

BURNER	REGULATOR TYPE	REGULATOR CODE
► RS 25/E – 35/E – 45/E – 55/E BLU	RWF 40	3010417
► RS 68/E-EV – 120/E-EV – 160/E-EV – 200/E-EV BLU	RWF 40	3010414

The relative temperature or pressure probes fitted to the regulator, must be chosen on the basis of the application.
